

PE Foam Tape

Description

Naikos PE foam tape consists of consisting of a very conformable PE-foam backing and on a relrase film coated with acrylic adhesive. This foam tape designed to provide high shear strength and serves as a solution for bonding issues on various surfaces. It offers good temperature resistance and long term durability, suitable for indoor and outdoor mounting and bonding applications.

Construction

Features

- * High ultimate adhesion level for a reliable bonding performance
- * Unique acrylic adhesive system provides long term durability
- * UV, water and ageing resistant suitable for the indoor and outdoor application
- * Soft, conformable foam adapting to structured surfaces
- * Shock absorption and sealing function
- * Suitable for automatic and manual module assembly

Application

- * Automotive industry
- * Furniture industry
- * Metal, plastic, wood, leather
- * Electronic
- * Nameplate
- * Wheel weight

Properties

Item	NKS-####P
Color	White / Black
Carrier	PE Foam
Adhesive	Acrylic Adhesive
Total Thickness	0.2~3.0 mm(8~120 mil)
Adhesion to Stainless Steel	≥15 N/25mm(≥53 oz/inch)
Holding Power	>24Hr
Temperature Resistance	-20~+120°C(-68~+248°F)
Width	4~1030mm(Customized Width Available)
Length	33/50/200/300 m(Customized Length Available)
